UPCOMING SESSIONS

Principal As Instructional Leader Test Prep

PAIL Certification Assessment Test Prep

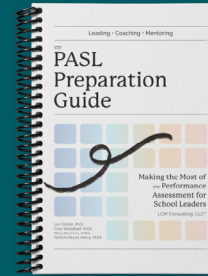

The PAIL Test Prep session will familiarize you with the types of questions you will encounter on the 268 exam. In the morning, you will practice test-taking strategies to tackle the multiple-choice section of the 268 test. You will work on developing fluency as well as stamina throughout the daylong training. In the afternoon, you will be instructed on how to approach the four Constructed Response items and clustered sets of questions that are based on a specific case. You will write an actual constructed response and receive personalized feedback using the CR rubric.

Constructed Response Deep Dive

The Constructed Response Deep Dive session will provide more specific instruction and additional practice with constructed response items. You will write two CRs during this training—one in the morning for which you will receive individual feedback, and another in the afternoon which you will self-score. The CR portion of the 268 exam is 40% of the overall test score and is an area that can be improved with guided rehearsal and practice.
