2 **Executive Summary**

Provide an overview of proposal components included as part of the vendor's submission. Include the history and leadership of the vendor's organization.

Texas Public Safety and Investigations was founded in 2018 as a division within Texas Public Safety Training Academy. This division was charged with responding to natural disasters by conducting field work rather than academic and hands on training. Texas Public Safety and Investigations responded to several natural disasters such as Hurricane Ida, Winter Storm Uri and the COVID-19 Pandemic. By 2020 this division had grown rapidly in demand, size, and budget, exceeding its parent organization significantly. As a result of this in July 2020, Texas Public Safety and Investigations became an independent organization and rebranded as TXPSI, LLC (DBA: Texas Public Safety and Investigations). With this change organization growth and strategic decisions could better be achieved. Within TXPSI, three separate divisions were formed, each charged with a unique mission and individual goals, however unified under one public safety executive leadership team. The Security & Law Enforcement Division is the largest and maintains the most robust workflow and missions. Our EMS/Rescue Division is the next largest in size and compliments our other divisions by providing medical team members upon request to assist in their assignments. The Fire Division is the smallest and is comprised of both fire suppression and fire prevention personnel who take part in response to fires, damaged fire alarm/suppression systems as well as fire inspection requests. Our unique composition ensures that any public safety need our clients have can be met by one organization which operates under the leadership of highly credentialed and experienced leaders. Without this multidisciplinary capability, clients would have to outsource various parts of service needs which conventional security service providers are unable to provide.
